

VERDE GLASS INDUSTRIES LLP

Company Brochure | Sustainable Glass Recycling
& Industrial Supply Solutions

We transform recyclable waste glass into industrial-grade glass powder, glass cullets, and reusable bottle supply solutions for modern industries

Glass Powder & Cullets

Processed raw materials for construction, tiles, ceramics, coatings, filtration, glass remelting and industrial filler applications.

Reusable Bottle Supply

Collection, sorting, inspection, brand-wise segregation and bulk reusable bottle supply for breweries and beverage manufacturers.

Green Strength. Clear Results.

Industrial Glass Powder

Engineered for versatility and supplied according to client requirements, our glass powder supports multiple industrial applications where purity, consistency and particle size matter.

Custom mesh sizes can be discussed based on application and volume requirement.

Applications

- Construction material and concrete reinforcement
- Tiles, ceramics and glazing use-cases
- Abrasives and sandblasting media
- Paints, coatings and industrial fillers
- Filtration and specialized industrial applications

Product Highlights

- Mesh size customizable as per client requirement
- High silica content (SiO₂) for chemical stability
- Sorted, cleaned and contamination-conscious processing
- Available for bulk industrial supply planning

Industrial Glass Cullets

- Clear/flint, amber and green cullets
- Ready for remelting or decorative use
- Useful for container glass, fiberglass and road-base applications
- Focus on removal of organics, metals and ceramic contaminants

Packaging & Logistics

- 25kg / 50kg high-durability bags
- Bulk loose shipments
- Flexible transportation arrangements
- Scheduled deliveries for repeat buyers

Reusable Beer Bottle Supply Solutions

Collection - Sorting - Inspection - Brand-wise Segregation - Bulk Supply

A cost-effective and sustainable supply-chain solution for breweries and beverage manufacturers across Andhra Pradesh and South India.

Quality Inspection Process

- Brand-wise segregation
- Neck finish inspection
- Crack and damage inspection
- Color and size sorting
- Damaged bottle removal before dispatch

Supply & Logistics

- Bulk bottle collection network
- Palletized bottle supply
- Flexible transportation arrangements
- Scheduled delivery planning
- Consistent regional sourcing

Benefits for Breweries

- Reduce packaging procurement costs
- Improve bottle recovery efficiency
- Support sustainability goals
- Lower carbon footprint
- Build a long-term reusable packaging partnership

Why Partner With Verde Glass?

We combine circular-economy thinking with practical industrial supply. Our focus is to help buyers reduce waste, improve raw material access and build reliable local supply chains.

Circular Economy

Every ton of recyclable glass redirected to useful industrial applications supports a cleaner material cycle.

Custom Supply

Mesh size, color segregation, packaging and logistics can be planned according to buyer requirements.

Quality Focus

Sorting, cleaning, inspection and contamination control are built into the supply process.

Regional Advantage

Local sourcing and supply planning supports faster coordination across Andhra Pradesh and South India.

Partner with Verde Glass Industries LLP

Share your requirement for glass powder, glass cullets or reusable bottle supply. We can discuss application, quantity, packaging, logistics and sample availability.
