## WHY PARTNER WITH US?

- Custom Particle Engineering: We don't just sell "standard" sizes. We manufacture mesh sizes tailored specifically to your industrial application.
- Purity Guaranteed: Rigorous sorting and cleaning processes to ensure furnace-ready cullets and contaminant-free powder.
- Scalable Supply: Reliable logistics and high-volume production capacity to meet the demands of large-scale manufacturing.
- Certified Quality: Proudly registered under MSME Udyam, adhering to Indian industrial standards.

## OUR PRODUCTS

### 1. High-Performance Glass Powder

Our glass powder is engineered for maximum versatility. Because we control the milling process, we can provide the exact micron level required for your project.

- Applications: Construction (Concrete reinforcement/Glazing), Abrasives (Sandblasting), Paints & Coatings, Filtration, and specialized industrial fillers.
- Mesh Size: Customizable (According to client requirements).
- Chemical Stability: High silica content ( $\text{SiO}_2$ ) for superior chemical resistance.

### 2. Industrial Glass Cullets

We provide high-purity, sorted glass cullets ready for remelting or decorative applications.

- Colors: Clear (Flint), Amber, and Green.
- Quality: Free from organics, metals, and ceramic contaminants.
- Usage: Ideal for glass container manufacturing, fiberglass production, and sustainable road base.

## Logistics & Packaging

We offer flexible packaging solutions including:

- 25kg/50kg high-durability bags.
- Bulk loose shipments via specialized transport.
